

## Homework

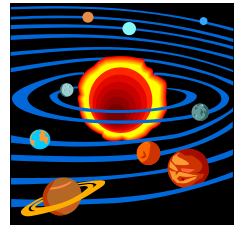

### Solar System model

For homework this week we would like the children to make a picture, mobile or a diorama of our Solar System.

They need to show our star and planets plus any other details they wish to put in (moons, asteroids, comets, dwarf planets etc.)

This can be drawn on paper or they can use pictures downloaded from the internet.

Your child could make a 3D model if they prefer (shoe boxes are good for this) or make a mobile.

This is **not an assessment** but some creative fun.

The students have all this week and most of next week to do this as it needs to be in by **Friday 10th February**.

We will display them outside the classroom and downstairs.

This is the same day that the students will come dressed up, making the day even more fun!!

We will parade around the school singing songs and visiting our friends from Planet Earth.
